Dry Root Rot Portal (DRoP)

The data and resources presented in the Dry Root Rot Portal (DRoP) are intended to promote scientific advancement and strengthen research and management strategies for dry root rot disease in pulse crops. All content available through the portal is provided strictly for non-commercial, academic, research, and extension purposes.

Every effort has been made to prevent copyright infringement and to ensure that all datasets, images, publications, and associated materials are appropriately credited. The primary copyright of original research articles, datasets, images, and related content remains with the respective authors, publishers, and data repositories.

The copyright for curated, analysed, integrated, and value-added datasets presented within the DRoP platform as structured applications, tools, visualizations, and knowledge resources is owned by DRoP.

When using any information, dataset, image, or analytical output from DRoP, users must:

- Cite the Dry Root Rot Portal (DRoP) appropriately.
 - Cite the original source of the data (journal article, repository, or database), where applicable.
-

Note

- All phenotypic images, datasets, and extracted information from published articles are fully cited with complete references and hyperlinks to the respective journal webpages or publicly accessible repositories.
- For omics datasets (genomics, transcriptomics, metagenomics, proteomics, metabolomics, and phenomics), accession numbers (e.g., SRA, GEO, or other repository identifiers) are provided along with proper citation of the associated publication.
- Authenticated pathogen strain records, germplasm datasets, and research protocols are referenced with appropriate attribution to their original contributors.
- The full-length references of all publications included in the portal are listed under the “Lab publications” and “Literature” sections.
- The data hosted on DRoP is intended exclusively for academic, research, training, and non-commercial use.

Creative Commons Licensing

Certain datasets, images, and resources integrated within DRoP may fall under one of the following six Creative Commons (CC) license categories:

1. Attribution (CC BY)

This license permits users to distribute, remix, adapt, and build upon the work, even commercially, provided appropriate credit is given to the original creator.

2. Attribution-ShareAlike (CC BY-SA)

This license allows adaptation and commercial use with proper credit, provided that derivative works are licensed under identical terms.

3. Attribution-NoDerivs (CC BY-ND)

This license permits redistribution, commercial and non-commercial, as long as the work remains unchanged and proper credit is given.

4. Attribution-NonCommercial (CC BY-NC)

This license allows reuse and adaptation strictly for non-commercial purposes, with appropriate acknowledgment.

5. Attribution-NonCommercial-ShareAlike (CC BY-NC-SA)

This license permits non-commercial reuse and adaptation with credit, provided derivative works are licensed under identical terms.

6. Attribution-NonCommercial-NoDerivs (CC BY-NC-ND)

This is the most restrictive license. It allows downloading and sharing with proper credit but prohibits commercial use and modifications.

For further details regarding Creative Commons licensing, please visit [the official website of Creative Commons](#).

Users are encouraged to ensure compliance with the specific license terms applicable to each dataset or resource before reuse or redistribution.
